Skin:	Dry	Nomal	Sore	Itchy	Oedema
	Intact / Broken	Risk Assessment	Yes	No	

Pain Tools For Photocopying

Sedative Effects		Site Check	Respiratory Pattern		
Unconscious	1	No redness	1	Regular	R
Asleep /Rousable	2	Tracking /Warm	2	Tachypnoea	Т
Awake /Comfortable	3	Swollen	3	Wheezing	W
Agitated 4		Inflammation /Tenderness 4		Dyspnoea	D
				Cheyne Stokes	С

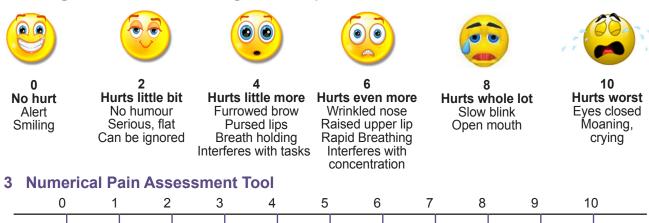

Out of the following 3 Pain Tools use the one you think is appropriate

1 FLACC Behavioural Pain Assessment Tool

Categories	Scoring									
	0	1	2							
Face	No particular expression or smile	Occasional grimace or frown, withdrawn, disinterested	Frequent to constant quivering chin, clenched							
Legs	Normal position or relaxed	Uneasy, restless, tense	Kicking, or legs drawn up							
Activity	Lying quietly, normal position moves easily	Squirming, shifting back and forth, tense	Arched, rigid or jerking							
Cry	No cry (awake or asleep)	Moans or whimpers, occasional complaint	Crying steadily, screams or sobs, frequent complaints							
Consolability	Content, relaxed	Reassured by occasional touching, hugging or being talked to, distractable	Difficult to console or comfort							

Each of the five categories: face, legs, activity, cry and consolability is scored from 0-2. The scores from each category should be added together for a final score.

2 Wong & Baker Visual Analogue Self-report Pain Assessment Tool

0 = No pain 1 - 3 = Mild pain

4 - 7 = Moderate pain

8 - 10 = Severe pain

Is an intervention required if so what? Implement intervention or interventions. Re-score at an appropriate interval to evaluate the effectiveness of intervention or interventions.

General instructions for use

This Drug Aministration Document is intended for use by qualified/Clinical Staff. Where prior medication continues to be necessary please refer to relevant drug chart from your organisation.

- The chart should be written legibly in indelible ink, should be dated, and should state the full name, address and date of birth of the baby, child or young person.
- The charts should be signed for each medication authorised to be given.
- Use of whole numbers is required e.g. 250 micrograms rather than 0.25 mg.
- When decimals are unavoidable a zero should be written in front of the decimal point where there is no other figure e.g., 0.5ml not .5ml.
- · Micrograms should not be abbreviated.
- Following zeros should not be used e.g., 3mg. not 3.0mg.
- The names of drugs and preparations should be written clearly and not abbreviated, using approved titles only.
- Any change in the drug therapy must be ordered by a new authorisation. Do not alter existing instructions.
- Discontinue a drug by drawing a line through it. Enter the date of cancellation and sign in the margin.
- The nurses responsible for setting up the syringe pump must check the compatibilities of the prescribed drugs and discuss the appropriate diluent and volume to be infused with the prescriber and document on pages 1 and 3.
- Where more than one syringe pump is used at any one time, one booklet should be used for each syringe pump.
